ACE Engineering College, Ghatkesar (JNTUH)

Senior Software Engineer, Optum Technology Solutions | Hyderabad, India

SUMMARY

Electronics & Communication Engineer by training, quality engineer by trade for six years, now writing software at Optum. Experience spans automation, quality engineering, and production software development.

EXPERIENCE

Senior Software Engineer — Optum Technology Solutions

Jul 2022 — Present

- Continuing a path from quality engineering into software engineering within Optum's technology organization.
- Carrying a quality-first mindset from six years in quality engineering into how software is designed, written, and reviewed.

Analyst !' Senior Quality Engineer — Cognizant

Oct 2016 — Jul 2022

- Joined as a fresher on a banking & investment project, then moved to a healthcare project as a tester.
- Progressed through Analyst, Test Analyst, Automation Test Engineer, and Senior Quality Engineer roles over roughly six years.
- Built automation suites with Selenium, Selenium Grid, Cucumber (BDD), and TestNG for regression testing at scale.
- Worked across enterprise platforms including ServiceNow, HPSM, F5, and Snowflake supporting large systems.

PUBLICATION

Published an international journal paper: "Performance Analysis of a 3x2 MIMO System for Fading Channel."
